Team Leadership

PROFESSIONAL SUMMARY

Tech leader with 9+ years of experience in fintech, specializing in lending solutions and driving innovation. Skilled in building scalable systems, reducing costs, and leading diverse teams to achieve business goals in both 0-to-1 and 1-to-100 scaling environments.

WORK EXPERIENCE

01/2025 – Currently

Engineering Manager, Stashfin, Gurgaon

Java Springboot

© **Managed** the entire pre-disbursal journey across multiple products, driving funnel optimization and improving customer conversion.

© **Led the re-architecture of the onboarding journey**, transitioning from a legacy PHP monolith to a Node.js microservices-based system, resulting in significantly lower API latencies and enhanced system stability.

© **Contributed to RBI-mandated Disaster Recovery (DR) drills**, ensuring compliance, business continuity readiness, and operational resilience.

06/2023 – 12/2024

VP Tech, SalarySe, Gurgaon

Java Springboot

© **Built, led, and managed** the entire lending vertical from the ground up.

© **Led integration efforts** with various NBFCs to launch **Line of Credit** and **Personal Loans** products.

© Spearheaded collaboration with key stakeholders to ensure seamless platform operations and efficiency in day-to-day operations.

12/2021 – 03/2023

Tech Lead, Siplly, Bangalore

NodeJS, Golang, Java Springboot, React, DevOps

© **Managed a team of 22 engineers**, acting as an enabler for any blockers, tech solutioning and ensuring smooth deliveries.

© Developed a rule-based config to show personalized homepage cards based on user journey. Enhanced and added new features for the lending product.

© Actively analyzed ways to reduce AWS costs and **reduced monthly bill by 60%**. Introduced and set up various monitoring and reporting tools.

© Handled the devops for lambda, EC2, S3, RDS, Opensearch, Elaticache and made architecture decisions.

06/2021 – 12/2021

Lead Developer, Jai Kisan, Bangalore

NodeJS, Express.js, Angular

© Worked with various stakeholders to develop and launch BNPL and enhanced existing products by leveraging automation and 3rd party tools.

© Developed a fully on the fly configurable underwriting module, automating the underwriting process for ~80% low ticket size loans

© Helped in setup of CI-CD using AWS CodeBuild, AWS CodeDeploy, and AWS CodePipeline to deploy services to AWS Lambda.

04/2021 - 06/2021

Engineering Lead, FlexiLoans Technologies, Mumbai

04/2019 - 03/2021

Senior Software Engineer, FlexiLoans Technologies, Mumbai

04/2017 – 03/2019

Software Engineer, FlexiLoans Technologies, Mumbai

PHP, Laravel, NodeJS, Devops

© Developed various features for internal LOS and solely responsible for integration and support with 3rd party LMS.

© Developed new features and added products (Vendor Financing, BNPL product, and Dealer Financing) in Invoice Financing's transaction management portal.

© Developed marketplace for Vendor Financing and **onboarded 5 co-lenders**.

© Reduced TATs significantly by finding automation opportunities like Auto disbursal (**100+ Cr** annually) and automated settlement mechanisms across invoices.

© Integrated with various 3rd party tools. Actively contributed towards finding and fixing vulnerabilities and hardening the infrastructure security.

© Managed the deployments using EC2 and Dockers.

EDUCATION

2021 - 2023

M.Tech (Software Systems), BITS Pilani WILP - CGPA: 9.09
